### Protective Gel Surface

### Track Layout

Protective pad is a GEL version of the center section of the LaBac™ Modular Trough system. The bottom has the LaBac™ 5 tracks sliding T-nut universal mounting system. Fits all the LaBac™ modular trough pieces. Comes with removable washable cover. Easy to fit as a hip guide, leg protector, trough center or any other place due to its versatile hardware. Comes with sliding t-nuts. Thanks to multi-track configuration, it can be used at angles.

| <input type="checkbox"/> | 415GT | 4" X 15" | Each | \$230 |

**Permobil Arm Pad Slipcover****Installation Instructions**

GEL slip cover made with 1/2" Dimensional GEL and a breathable cover. It slips directly over the existing Permobil foam armpad. These pads look lumpy in pictures and that is why they are so comfortable. When an elbow or whatever presses against it, there is open space within the pad so the pad naturally molds around what it is cushioning and creates a custom fit. These 'knobs' move with the body almost eliminating shear! The pad maintains softness under pressure while reducing shear and allowing air flow. Because the GEL is medical grade silicone, it never changes its softness with temperature and never absorbs moisture or odor.

This slipcover creates the most comfortable armpad available for a wheelchair. It's easy to install and sized to fit the Permobil Corpus seating system.

**Trough Liner**

These GEL pads are designed to 'Velcro inside' the Ottobock trough. With 'soft side loop' on the bottom, the 1/2 thick GEL liner is perfect for reducing pressure and abrasion problems. Neoprene / Nylon cover is easily cleanable and can tolerate most detergents and disinfectants.
