

Gel Ovations™

LIMIT-LESS™

It's not uncommon for medical professionals to find themselves walking the tightrope between client needs and opposing forces - whether it be hospital policy, federal or state regulations, family interest or financial constraints.

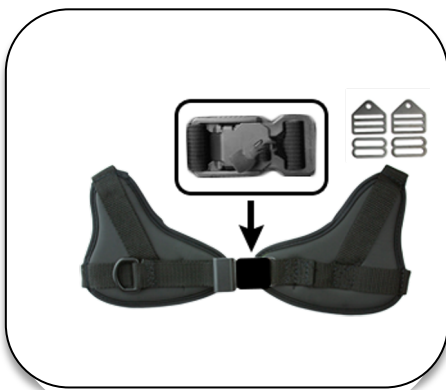

Walking the Tightrope

Nowhere is the tightrope more in evidence than in the areas of providing security and safety without limiting a client's freedom. **They have a right to be non- constrained by straps, seat belts or other well intentioned forms of restraint.**

And candidly, it's not common for the solution to come from the medical products industry.

Which is why **Limit-Less** is such an unexpected delight.

Closures and buckles that provide all the restraint you need for safety and which can be put on **and** taken off by clients with profoundly limited sight and fine motor skills.

Whether you choose the magnetic self-guiding buckle or the sliding version available on some products, this is one tightrope you will no longer have to deal with.

See for yourself.
